

Company Profile

# WHO WE ARE

CleanAir Europe Srl is an Italian company specialized in the manufacturing of **supports for filter bags for the abatement of industrial dust**. Constant research and targeted investments to create a highly specialized and agile structure in providing consultancy, services and products for the world of air filtration and separation.

## HISTORY

Since 1955, CleanAir has constantly been commercially present on the global market. Starting off in wires production in 1989, CleanAir now possesses over 40 years of top notch services in the field of air filtration.

## VALUES

Our customers know they can count on us because we know our work well: a blend of quality, reliability, integrity and accountability enables us to offer the best possible solutions to every project.

## SUSTAINABILITY

CleanAir's top priority is to combine full satisfaction of customer expectations with environmental compatibility and sustainability, while respecting the health of its employees and all stakeholders.

## ETHICS

Integrity and honesty are the necessary factors that have always characterized CleanAir. All parties involved must act according to the principles of fairness and full transparency to ensure a positive impact for everyone.

## PRODUCTS

CleanAir's products are known all over the world due to their high quality and reliability. All products are designed and manufactured internally to answer multiple functions and applications according to our clients' needs.

## SECTORS

CleanAir has considerable application knowledge and rich experience in multiple industries: metalworking, cement and minerals, food processing, parapharmaceuticals, energy, recycling and waste treatment.
